Fourth Course-Entrées: croquettes, sweet breads, fricassees.

Fifth Course-Roast meats.

Sixth Course-Sherbet.

Seventh Course—Entremêts: dressed vegetables, served alone each, as asparagus, spinach, cauliflower, macaroni, dressed eggs, etc.

Eighth Course-Game.

Ninth Course-Salad.

Tenth Course—Cheese—macaroni dressed with cheese, cheese omelet, etc.: cheese and salad often served together.

Eleventh Course-Puddings, charlottes, creams, etc.

Twelfth Course—Glacés: anything iced—ice cream, water ice, frozen pudding, etc.

Thirteenth Course—Dessert: fruit, nuts, raisins, bonbons, etc.

Fourteenth Course-Coffee.

It is very simple to prepare a dinner "à la Russe," as the many dishes do not have to be hot and in perfection the same minute, and served all together, but each succeeding course can be prepared while the other is being served and eaten. For a "tea party," or, in city parlance, "high tea," the coffee and tea equipages stand before the hostess. The table may be ornamented with fruit and flowers, but not in the formal fashion of a dinner party. Preserves may stand on the table in glass dishes.

Fried oysters, croquettes, chops and green peas, omelet and cold meats of various kinds may be served by the host. Vegetable and other salads are always welcome, and hot bread and coffee indispensable.

Bouillon often forms a first course. With bouillon a large teaspoon is provided.

"Good broth and good keeping do much now and then, Good diet with wisdom best comforteth men."

General Directions.—The basis of all good soups is the broth of meat. Put the meat into cold water, allowing one and one-half pints for one pound of bone and meat—equal quantities of each. Do not let it boil for the first half hour; then simmer slowly till done, keeping the pot closely covered. The next day, when the soup is cold, remove the fat.

Beef Stock.—Half a shin of beef; cover it with cold water, and boil slowly five or six hours, salt it and strain. In the morning take off fat. Then add the vegetables and herbs used for seasoning, cooking all well together about one hour. Strain the soup before sending to table.

Rice or Barley Soup.—Add to the above half a cup of rice or barley, and boil for one hour.

Vermicelli Soup.—One cup of vermicelli; break it up and boil ten or fifteen minutes. Then add to beef stock.

Macaroni Soup.—One cup of macaroni; boil three-quarters of an hour. Then add to beef stock.

Consommé.—Four pounds of the lower part of a round of beef, four pounds of the knuckle of veal, two tablespoons of butter, six quarts of cold water, one large onion, one-half a carrot, three stalks of celery, one tablespoon of salt, bouquet of herbs and a few spices. Cut the beef and veal into pieces, put one tablespoon of butter into a very clean soup kettle with the pieces of meat, stir over a hot fire until the meat is browned but not burned. Then add one quart of water; cook until a glaze has formed on bottom of the kettle, say about one hour. Then add five quarts of cold water, let it come slowly to the boiling point, set back and simmer for six hours. Remove scum from time to time. One hour before serving, add vegetables which

have been cut fine and browned in one tablespoon of butter. Add herbs and spices and one tablespoon of salt. When done strain through a fine cloth into a bowl and cool without covering. If the Consommé is not clear, put over the fire again, bring to the boiling point and add the white and crushed shell of one egg, mixed with a little cold water, boil two minutes, then stand on back of range to settle, then strain through two thicknesses of cheese cloth.

Bouillon.—A knuckle of beef well cracked and a small veal bone; one-half each of a carrot, turnip and onion; a little celery. Cover the bones with water and let kettle stand where it will boil slowly all day-twelve hours if possible; the last three hours have the vegetables in. Salt, strain through a colander into a stone jar; in the morning remove all fat. Heat the jelly, which should be solid, and strain through a flannel bag. Bouillon is simply good, strong stock, well seasoned.

Mrs. L. C. Wead.

Bouillon, No. 2.—Should be served in little china cups. Place a fowl that has been half roasted in the soup kettle, with three pounds of lean beef, salt and pepper them and pour over them three quarts of cold water. Then set it over a good fire. In about half an hour remove the scum, then add ordinary sized carrot, one small leek, one stalk of celery, a little parsley, bay leaf, one onion and two cloves, clove of garlic, let it simmer for about five hours, then skim again; strain into an earthen bowl, where it can cool rapidly. When ready to serve, heat.

Mrs. J. R. Flanders.

Vegetable Tomato Soup.—Two quarts beef stock, one can or one quart of fresh tomatoes, one-half can or one-half pint fresh peas, same quantity string beans, cut in small pieces, and a small onion, cut fine. Cook all in stock, season with pepper and salt. Do not strain. Serve with squares of toast.

Mrs. Ralph.

Black Bean Soup.—Soak one pint of black beans over night. In the morning pour off the water, and add three quarts of water, with any bones, either of beef or mutton. Boil slowly five or six hours. When half done add one scant teaspoon of cloves in a bag, and an

onion, if liked. Skim carefully if it is to be used the same day. Strain it, mashing the beans slightly with a spoon. Lay slices of lemon and hard boiled egg in the tureen, and pour the soup upon them.

Mrs. Richardson.

Bean Soup.—To about three pounds of a well-broken joint of veal add four quarts of water, and let it boil one hour. To this add a scant pint of beans, which have been previously soaked over night and parboiled. Let cook slowly two hours. Season with pepper and salt. One-half hour before going to the table add a cup of sweet milk; also a small piece of butter. Serve with crackers.

Mrs. Emma Hawkins.

Pea Soup.—Use one quart of split peas, soaking them over night. Put over the fire at nine in the morning, in four quarts of cold water; add one finely chopped onion and a pound of salt pork. Boil four hours; strain and put back on the stove for one-half hour.

Mrs. Gillett.

Split Pea Soup .- One cup of peas, three pints of cold water, one tablespoon of butter, one tablespoon of flour, one-half teaspoon of sugar, one teaspoon of salt, one salt spoon of white pepper. peas over night, put them on to boil in three pints of cold water, and let them simmer until dissolved, adding enough water as it boils away to keep three pints of liquid in the kettle. Keep well scraped from the sides of kettle, and when soft, rub through a strainer, and put on to boil again. Add either water, stock, milk or cream to make the consistency you wish. It should be more like a purée than a soup. Cook the butter and flour together, and add to the strained soup while boiling; add salt and pepper, and when it has simmered ten minutes serve at once with toasted dice of bread. It must always be strained, and thickened with flour and butter, or it will separate as it cools. It may be varied in many ways, by adding half of a can of tomatoes before straining, or by boiling with the peas a small onion, or by adding any remnants of bone or meat. Mrs. J. Lincoln.

Tomato Soup.—One can or a quart of nice ripe tomatoes, chopped fine; also, two or three good-sized onions, chopped fine, a handful of rice, two quarts of water. Boil nearly an hour. Then add pepper, salt, and butter the size of a small egg; last, add one quart of good, rich milk. Taste, and season more if needed; it requires a good deal of salt.

Mrs. J. S. Phillips.

Tomato Soup.—One quart can of tomatoes, three pints of milk, a large tablespoonful of flour, butter the size of an egg, pepper and salt to taste, a scant teaspoonful of soda. Put the tomato on to stew and the milk in a double kettle to boil, reserving, however, half a cupful to mix with the flour. Mix the flour smoothly with this cold milk, stir into the boiling milk, and cook ten minutes. To the tomato add the soda, stir well, and rub through a strainer that is fine enough to keep back the seeds. Add butter, salt and pepper to the milk, and then the tomato. Serve immediately. A little whipped cream added when serving improves this. If half the rule is made stir the tomatoes well in the can before dividing, as the liquid portion is the more acid.

Tomato Soup.—Put into a sauce-pan one quart of stewed or can of tomatoes, one pint of stock, one bay leaf, one small onion, sprig of parsley, let all cook for fifteen minutes, press through a sieve to remove seeds, return to the sauce-pan and place on the range, rub a tablespoon of butter and two of flour together until smooth and stir into the soup when boiling. Stir constantly until smooth, add salt and pepper. Serve with *Croutons*.

Potato Soup.—Three potatoes, one pint of milk, or milk and water, one teaspoon of chopped onion, one-half teaspoon each of flour and butter. Cook onion in milk, then add the potato, which has been previously boiled and mashed. Rub through strainer and return to kettle. Stir flour and butter together, add a little soup and stir into the remaining soup. Boil a few moments, season with pepper, salt and a little parsley. Serve with toasted crackers.

Stewed Oysters.-One quart of milk, one quart of water; salt

and pepper to taste; six crackers rolled fine and cooked in the milk and water twenty minutes; then add three pints of oysters and half a cup of butter, and let it come to a boil.

Mrs. F. J. Seaver.

Oyster Soup.—Put one quart of oysters in a colander to drain, then pour over them one pint of cold water and drain it into the liquor. Put the liquor into the sauce pan and when it boils skim it. Add one pint of milk or cream. Wash the oysters by allowing cold water to run over them through the colander. Add them to the soup with one tablespoon of butter, salt and pepper to taste. Let all come to a boil and serve.

Turkish Soup.—Bring to the boiling point one quart of good stock (white preferable). Add to it one teaspoon of onion juice, blade of mace, one bay leaf and a little parsley if liked. Stand over a moderate fire fifteen minutes. Then strain and add two-thirds of a pint of milk, salt and pepper to taste. When ready to serve take kettle from the fire and add quickly the yolks of two eggs, beaten with two tablespoons of cream. Serve immediately with cheese croutons.

Mrs. Hawkins.

Turkey Soup.—Boil a turkey or chicken carcass, dressing and all, for two hours, adding one onion. Take out and chop all the meat and return to the soup. Then add stalks of celery, cut fine, and thicken with two tablespoonfuls of flour. Half an hour before serving, add one cup of cream or milk.

Mrs. Breed.

White Stock for Soup.—To four pounds of veal, lamb or chicken, put five quarts of cold water. This should be heated only moderately for the first half hour, after which place the pot on back of stove, allowing the soup to simmer for four or five hours or until the meat falls from the bones. Strain through colander into an earthen dish, add a little salt and set to cool; when cool remove fat.

Mrs. Breed.

Cream of Celery Soup.—To one pint of white stock add a small onion, large cup of celery cut in small pieces, cook until soft enough

to strain through a sieve, after which return to the kettle; add one pint of milk; thicken to the consistency of cream, using about one tablespoon of flour. Just before serving add one pint of cream and a piece of butter the size of a walnut.

Mrs. Breed.

Asparagus Soup.—Follow directions for celery soup, substituting asparagus for celery, and use the asparagus tips to drop in about five to ten minutes before serving.

Cream of Green Peas.—Follow the directions for celery soup, substituting one pint of green peas for celery.

Corn Soup.—One pint of grated corn, one quart of milk, one pint of hot water, one even tablespoonful of flour, two tablespoonfuls of butter, one slice of onion, salt and pepper to taste. Cook the corn in the water thirty minutes. Let the milk and onion come to a boil. Mix the butter and flour together, add a few tablespoonfuls of the boiling milk, when smooth, stir into the milk and cook eight minutes, remove the onion, strain corn and add to the above. After cooking a little add one cup of sweet cream, and when thoroughly heated, a small piece of butter, and serve.

Mrs. H. E. King.

Corn Bisque.—Take one can of corn, place on back of stove, let it cook slowly for three or four hours, then strain through a colander. To the liquid add one pint of milk, and thicken as desired, (about one tablespoonful of flour). Just before serving, add one cup of sweet cream which has been heated, and butter size of a walnut. Salt to taste. Serve when hot. Makes enough for eight or ten bouillon cups.

Mrs. S. T. Carpenter.

Velvet Soups.—To a quart of strong, well-flavored consommé (beef, chicken, mutton, game, or "combination") add a large cupful of rich cream which has been poured boiling hot on the beaten yolks of four eggs mixed with four tablespoonfuls of cold cream. As a last touch of seasoning in reheating, add a little powdered mace. Boiled chestnuts or blanched almonds, pounded to a paste, may be added, if desired.

FISH AND OYSTERS

"The best fish is the one that's caught."

Baked Trout.—Dry fish thoroughly, inside and out. Sprinkle inside with pepper and salt, and put in a small cup of butter. Cut fish in sections and insert small strips of salt pork; put in dripping pan, on a rack. Just before taking from the oven pour over the fish a coffee cup of sweet cream. Let brown if necessary; thicken gravy with a little flour.

Stuffed Lake Trout.—Clean the fish and prepare a dressing of bread crumbs, butter, salt, pepper, a little milk, to moisten, and fill the fish. Bake about one hour.

Miss W. Childs.

Fish Dressing.—One cupful of stale bread crumbs, moisten with a little cold water, add a small onion chopped very fine, or the juice. One teaspoonful of thyme, savory, parsley, salt and pepper to taste, mix with one egg, stuff, tie, and bake with slices of salt pork until done.

Mrs. W. S. Lawrence.

Brook Trout, Fried.—Wash, wipe and roll in meal or flour; drop into the frying pan of hot butter; fry to a nice brown. After removing the fish, pour a cup of cream into the frying pan, adding a little pepper and salt; boil a minute or two and pour over the trout.

Mrs. Gillett.

Adirondack Trout.—Catch'em; remove inwards; pack in fine salt to slime—two ounces to each pound of fish; let them remain in slime twelve hours; then clean thoroughly and pack in broken ice and swamp moss; keep in a cool place till used. To fry, put a piece of butter size of an egg in a pan; heat as hot as possible without burning; drain and lay trout in pan; salt lightly; cook on one side; remove pan from fire; turn the trout and crisp to taste. Serve la woods.

M. E. McClary.

Boiled Salmon.—The middle slice of salmon is the best. Sew up neatly in cheese cloth, boil a quarter of an hour to the pound in hot salted water. When done, unwrap with care, lay upon a hot platter, taking care not to break it. Have ready a large cupful of drawn butter, very rich, in which has been stirred a tablespoonful of minced parsley and the juice of a lemon. Pour half upon the salmon and serve the rest in a boat. Garnish with parsley and sliced eggs, or slices of lemon. Any fresh fish can be cooked in this way.

Turbot a la Créme.—Take a white fish or two pounds of halibut; steam or boil twenty minutes; break in flakes; remove the bones and sprinkle with salt and pepper. Take one quart of milk, three large slices of onion, a little parsley; put over the fire and boil one minute; mix four tablespoonfuls of flour with one-half cup of butter, add a little milk and mix to a cream; then pour it into the boiling milk and stir and cook until it forms a thick cream; take from the fire; add the yolks of two well-beaten eggs, and strain through a coarse strainer. Put in a buttered baking dish a layer of sauce and a layer of fish alternately until the dish is full, the sauce being on top; sprinkle with bread crumbs and bake one-half hour in a moderate oven. May be baked in shells.

Mrs. J. E. Taylor.

Creamed Codfish.—Put fish on the stove in cold water; keep warm, but do not boil until the fish is softened; remove bones and skin, shred finely and put it in a sauce pan with rich milk, in proportion of one pint of milk to one coffee cup of fish; let it come to a boil and thicken with a teaspoon of flour. Just before taking from the stove stir in butter size of an 'egg, and one beaten egg. Season with pepper and garnish with hard-boiled eggs, or place poached eggs carefully on fish with a little salt and pepper on each egg. If you wish, the fish may be shredded before putting in cold water. Fish prepared as above is good poured over buttered toast.

Codfish Balls.—One coffee cup of boiled codfish, picked very fine; add two cups of mashed potatoes, one egg, three tablespoons of cream,

and butter size of an egg; salt and pepper to taste. Beat all together until very light; make into balls, roll in flour and fry in butter. Enough for five persons.

Nellie O'Connell.

Codfish Balls.—One quart of potatoes, pared and sliced; one pint of codfish, finely shredded; two eggs, one tablespoon of butter. Boil potatoes and codfish together, mash and add the beaten eggs and butter. Beat all together until very light. Shape in balls and fry like doughnuts.

Mrs. Chipperfield.

Note.—One-half teaspoon of mustard improves fish cakes.

Codfish and Potatoes.—Prepare the fish as for fish balls, only not as fine; put in a baking dish, with alternate layers of cold boiled potatoes sliced and seasoned with butter and pepper. Pour over all two cups of sweet cream or cream sauce. Bake one-half hour.

Mrs. Pease.

Codfish Fried in Butter.—Pull codfish apart and soak over night. In the morning put in a dry towel, absorbing all the water. Make a batter of two eggs, a tablespoon of flour; roll the fish in this and fry in butter.

Miss Chambers.

Broiled Fish.—Wash and dry fish in a towel. Place on a greased broiler, flesh side down, over clear coals, but not so hot as for beef steak. Season with butter, pepper and salt. Salt fish freshened twenty-four hours is also good broiled.

Salt Mackerel.—Freshen over night with the flesh side down. Bake in dripping pan one-half hour; then place on hot platter and add one small cup of sweet cream and a little butter.

Mrs. McClary.

Broiled Mackerel.—Soak the fish in a large pan of cold water, flesh side down, for eighteen hours; change the water. When ready to cook, wipe dry and lay on a greased broiler, broil with flesh side down, over a clear fire, then turn and broil the skin side. Be care-

ful, as this side burns quickly. When cooked place on hot platter and spread with butter or serve with Maitre d' Hôtel Sauce.

Mrs. Rorer.

Broiled Finnan Haddie.—Plunge fish into boiling water and let it remain five minutes, then dry thoroughly on a cloth. Broil over a clear fire, flesh side down at first, turning occasionally to keep from burning; the skin side needs only to brown, the flesh side needs the cooking. When done put on hot platter with a little butter, or one tablespoon of melted butter and a teaspoon of lemon juice.

Broiled Shad Roe.—Wash and dry the roe with care not to break the skin, place it on a well-greased broiler and rub it with butter once or twice during the time of broiling; cook to a nice brown, place it on a hot dish and cover with a Maitre d' Hôtel sauce. Can be baked or cooked in a Sauté-pan.

Halibut à La Flamande.—Have steaks two inches thick cut from the halibut, cover the bottom of a baking pan with one tablespoon each of butter in small bits, onion and parsley chopped fine, one-half teaspoon of salt and a few dashes of pepper. Lay the steak on this. Beat the yolk of one egg light, brush it over the top of the fish and cover with one tablespoon each of onion and parsley chopped fine, one tablespoon of butter, one-half teaspoon of salt and a little pepper. Pour over each steak one teaspoon of lemon juice. Bake forty minutes. Garnish with lemon and parsley. Serve with Hollandaise sauce.

Mrs. J. E. Taylor.

Broiled Halibut.—Season the slices with salt and pepper, and lay them in melted butter for half an hour, having them well covered on both sides. Roll in flour and broil from twenty to thirty minutes over a clear fire. Serve on a hot dish, garnishing with parsley and slices of lemon. The slices of halibut should be about an inch thick and for every pound there should be three tablespoonfuls of butter.

Miss Parloa.

Escaloped Fish.—Take cooked fresh fish; put alternate layers of fish and cream sauce in a baking dish. Cover with fine cracker crumbs and pieces of butter. Bake one-half hour.

Oyster Cocktails.—In a wineglass put one tablespoon of lemon juice, four tablespoons of tomato catsup, three drops of tabasco sauce, a dash of celery salt and a dash of Worcestershire sauce for six oysters.

Mrs. L. C. Wead.

Escaloped Oysters.—Butter a dish that is about three inches deep; put in a layer of cracker and bread crumbs; then a layer of oysters free from their liquor; then bits of butter; sprinkle with pepper and salt; do this until you have used a quart of oysters; over the whole pour a teacup of sweet cream, and bake three-quarters of an hour.

Mrs. Parmelee.

Fried Oysters.—Take with great care from the liquor as many oysters as you wish to fry; lay flat on a soft napkin; press another lightly over to absorb all liquor; beat several eggs in bowl; roll fresh, crisp oyster crackers to fine powder; melt enough sweet butter to cover bottom of pan one-eighth inch deep; dip each oyster in eggs, and roll in cracker, without breaking the oyster, until completely incrusted; place carefully in pan, and fry quickly to nice brown; turn oysters so as not to break crusting. Serve on hot plates with buttered toast.

T. W. Miller.

Note.—Serve with oysters finely shredded cabbage, with French dressing.

Fricasseed Oysters.—Put in a sauce pan one quart of oysters with their liquor, boil a little, then put in a colander, shake well until thoroughly dry, then put back in the sauce pan with a cup of sweet cream, a little butter, a little white pepper and salt; put a tablespoon of flour into the cream to thicken. Serve on toast.

Mrs. Belding.

Creamed Oysters.—Put butter size of an English walnut into a sauce pan, add a little parsley, celery, onion, mace, nutmeg, and a small piece of bay leaf. Let simmer, but not brown. Sprinkle in two

tablespoonfuls of flour, cook, stirring constantly. Pour in strained juice of one and one-half pints of oysters (hot), cook slowly for one-half hour. Then add one-half cup of thick cream, heated. Run through a sieve. If not thick enough add a little more flour wet with milk. Season with red pepper and salt, juice of one-half lemon. Cook oysters in sauce until plump and hot. Mrs. S. A. Beman.

Deviled Scallops.—Put one quart of scallops in sauce pan, bring to boiling point in their own liquor, drain and chop fine, saving liquor. Put three tablespoonfuls of butter in a bowl, beat to a cream, add scant teaspoonful of made mustard, one teaspoonful of salt, dash of cayenne, and beat well. Now add one cup of hot stock. Stir scallops and then liquor into this sauce and let stand one-half hour. Then put in baking dish or shells. Sprinkle with crumbs and dot with butter and bake in a moderate oven twenty minutes.

Miss Parloa.

Scallops Fried in Batter.—Make a batter of one pint of flour, two eggs, one tablespoonful of salad oil, one teaspoonful of salt, nearly one-half pint of milk. Beat eggs light, add milk, then pour the mixture upon the flour. Beat hard for two or three minutes. Then add salt and oil. Drain and dry one quart of scallops, season with salt and pepper. Drop into the batter and then drop spoonfuls of scallops and batter into boiling lard. Cook for three minutes, drain and serve at once.

Miss Parloa.

Deviled Crabs.—Twenty-five live crabs steamed about twenty minutes; pick them out carefully, bodies first, then the claws. Take four hard boiled eggs, mash fine, mix them with crab meat, fork them together. Take two cups of milk, two tablespoons of butter and two of flour creamed together; have the milk scalding. One tablespoon of Worcestershire sauce, about one-third of a nutmeg grated, a little cayenne pepper, salt to taste. Take fifteen shells and wash carefully, then fill shells and cover with white dried bread crumbs, put a little butter on each and brown in the oven.

Mrs. Frank Haven.

A Simple Timbale of Halibut.—Take a half pound of uncooked halibut. Cut it into fine pieces, pound it in a mortar, and pass it through a sieve. Mix a cupful of white bread crumbs with a half cupful of cream, and stir until it makes a smooth paste; remove it from the fire, add the fish pulp, a half teaspoonful of salt, and a dash of paprica. Then beat in lightly, a little at a time, the whipped whites of five eggs. Fill buttered timbale molds with the mixture, and place them in a pan of hot water in a moderate oven for thirty minutes. This will fill a quart mold, or eight individual molds. Serve with a white or with a tomato sauce.

Mrs. Belding.

Salmon Wiggle.—One and one-half cups of milk, four tablespoons of butter, three tablespoons of flour, one cup salmon picked apart with fork, one cup green peas, pepper and salt to taste. Make a sauce of the milk, butter and flour. When it thickens, stir in peas which have been previously warmed. Serve hot.

Sadie Thompson.

Little Pigs in Blankets.—Take as many large oysters as are wished and dry them with a towel. Have some fat bacon cut in very thin slices, cover each oyster with them and pin on with wooden toothpicks. Broil or roast them until the bacon is crisp and brown. Do not remove toothpicks. Serve hot.

"Within these folds we may confidently look to find the intellectual powers of man."—Duke of Argyle.

MEATS AND POULTRY

"Who can offer such a dish
May dispense with soup or fish;
And if he a guest should wish,
Let him send for me."

Roast Beef.—Place meat on a rack which will raise it a little above the bottom of the pan. Put in a corner of the pan a half teaspoonful of salt and a quarter of a teaspoonful of pepper. Put in also two tablespoonfuls of water. Place in a very hot oven for fifteen or twenty minutes until meat is browned; then lower the temperature of the oven and cook more slowly until done; baste frequently. Allow fifteen minutes to the pound. Mrs. Belding.

Yorkshire Pudding.—One pint of milk; one teaspoonful of salt; two cups of flour sifted with one teaspoonful baking powder; four eggs, beaten thoroughly; mix all together quickly—eggs, milk and salt, then flour—pour off fat from the gravy in the pan, and then pour in the pudding. Continue the roasting, letting the drippings fall on the pudding; baste the meat with the gravy taken from the pan. From half an hour to fifty minutes will make the pudding. Cut the pudding in small squares and serve about the beef, or separately if preferred.

Mrs. C. L. Hubbard.

Beef à la Mode.—Take from six to eight pounds of the round of beef, free from bone; one-fourth pound of salt pork; cut the pork into one-fourth inch strips, pepper, and draw through the beef with a larding needle; place in a kettle one-third full of boiling water—keeping the beef from the bottom of the kettle by placing a wire frame or narrow pieces of board under it. Then cut fine two or three carrots, one large onion, and put over the beef; keep enough water in the kettle to steam the meat; care should be used not to burn. Cook three to four hours, keeping the kettle closely covered; when done remove the beef, leaving carrots and onions in liquor, which thicken for gravy.

Mrs. Ralph.

Smothered Beef and Onions.—Take a good-sized steak (round is the best) and six onions; remove bone from steak; chop onions fine; pepper and salt; place on steak, and roll; fasten firmly; put in frying pan with a little water; cover closely, and steam about fifteen minutes; then put a good-sized piece of butter in the pan, and cover again; steam till done, having just enough water in pan to keep from burning.

Mrs. Ralph.

Irish Stew.—Take the remnants of a roast of beef; pare four potatoes and slice one-half inch thick; one or two onions cut up fine; one-third cup of rice, if desired. Place meat over fire in three quarts of cold water, two hours before dinner, onions and rice one hour, potatoes twenty minutes. Season with pepper and salt. Remove bones and add dumplings fifteen minutes before serving. For the dumplings use one pint of flour, two rounded teaspoonfuls baking powder, salt, and sweet milk for a stiff batter. Drop by spoonfuls into boiling soup fifteen minutes before serving. Do not raise the cover or let the soup cease to boil after they are added.

Mrs. McClary.

To Broil Beefsteak.—A perfect steak should be from one and one-half to two inches thick. Trim it a good shape, heat the broiler very hot, greasing with a piece of the fat. Lay outside edge towards the handle so that the fat may run on the meat. Place it close to the hot coals and count ten slowly, turn it and do the same, to sear the outside and keep the juices in, then hold it farther from the coals, turning very frequently. Broil from eight to fifteen minutes according to the thickness of the steak. A steak should be rare, but not raw, should have a uniform red color and be full of juice. Put on hot platter, sprinkle with salt and pepper, and spread with butter. It is excellent with tomato or mushroom sauce poured over the steak.

Mrs. Belding.

Hamburg Steaks.—Chop one pound of lean raw meat very fine, remove all the fiber possible. To the mince add one-half table-spoonful of onion juice, one-half teaspoonful of salt, one-fourth tea-

spoonful of pepper, dash of nutmeg, one egg. Form into small balls and flatten, or shape in tin, good inch and a half thick. Broil same as beefsteak. Serve with Maitre d'Hôtel sauce.

Roast Steak.—Have two pounds of good tender steak. Have ready a dressing of bread crumbs; spread this on the steak and roll; tie firmly. Have the oven hot, and bake an hour. Sprinkle on salt and pepper just before it is done.

Mrs. Gillard.

Potted Beef.—Take a large beef shank, and put into enough cold water to cover it. Boil till very tender—till all the bones and cartilage can be easily removed. Chop the meat fine, and replace in the pot with the liquor, which should be about one quart. Let it simmer gently; season with salt, pepper and a little sage or summer savory if you wish. Press, and when cold cut into slices. It is convenient for tea.

Mrs. Gilbert.

Beef's Tongue.—Boil a fresh tongue in salted water one and one-half hours. Before putting it in the water, trim it carefully and skewer into good shape. When it is boiled remove the skin. If it is to be used cold, replace the skewer, put it again in the water in which it was boiled and let it remain until cold. If used hot, pour over it a white or a piquante sauce, garnish with parsley. Spinach is a good vegetable to serve with tongue. Mrs. Belding.

Creamed Dried Beef.—One cup of dried beef. Let it soak in warm water a few minutes; pour off the water and add one pint of milk and cream. Thicken with a little flour, and season with pepper, salt and butter. Just before taking from the stove add one egg, well beaten.

Packing Beef.—For one hundred pounds of beef, take four quarts of salt, one and one-half ounces saltpetre, one and one-half ounces soda, four pounds sugar. Rub this together and then rub on the beef; pack very tightly and solidly; this makes the brine. For small families use small package, that each layer may be as small as possible, as taking away part of a layer drains the brine from the

remainder of the layer. Adding water takes away the peculiar excellence and tenderness of the beef. George Hawkins.

Corned Beef Hash.—To one heaping measure of meat chopped fine, allow two measures of chopped potato, season with pepper; put in frying pan and moisten with milk or cream; when hot add a generous piece of butter and mix. It may now be put in a baking dish and cooked in a quick oven until brown or left in the frying pan and cooked fifteen minutes, stirring occasionally.

Mrs. James Sawyer.

Meat Puffs.—Chop meat that has been previously cooked; season well with pepper, salt and butter; moisten with a little stock or water. Make nice puff paste; roll thin; cut into round cakes; fill with meat and bake. Serve warm.

Miss Amelia Greeno.

Mrs. Parmelee.

Roast Lamb.—Put salt and pepper on the meat and with a flour dredge sprinkle on a little flour. Place in the dripping pan without water. If there is not enough fat to baste it, when thoroughly heated, throw on a cup of boiling water in which has been placed a little butter. Baste frequently. If you choose, use a dressing made as for turkey. Serve with mint sauce.

Mrs. Gillett.

Crown of Lamb with Peas.—In cooking it care must be taken that it is thoroughly done. With the length of the ribs on both sides a crown roast may be prepared which is very effective in appearance. Stand the two pieces with the bone side outwards and draw them round together to a circle, tying or skewering them. Cover the ends

of the bones with greased paper or a flour and water paste so that they will not char, then roast in a quick oven. In serving fill with nicely cooked peas.

Ragout of Mutton.—For six persons. Three pounds of mutton, a carrot, a turnip, two tablespoons chopped onion, one quart potatoes, measured after being pared, and cut into one-half inch cubes; three tablespoons flour, three of butter, three pints of boiling water, and enough salt and pepper. Cut most of the fat off, and then cut meat in small pieces. Season and roll in flour. Put butter in frying pan, and all the vegetables (except potatoes), cut fine. Cook slowly five minutes, then add meat. Stir over a hot fire until a golden brown. Pour on the water and cook slowly one and one-half hours. Add potatoes and cook one-half hour longer. Mrs. Chipperfield.

Venison.—Lard the venison, rub with butter and dredge with flour, place in a hot oven and roast fifteen minutes to every pound, basting every ten minutes, at first with melted butter, and then with its own drippings. When half done season with salt and pepper. When done put on hot platter, add two tablespoons of flour to the fat in the pan, add one pint of stock and cook; take from the fire and add one tablespoon of currant jelly, season with salt and pepper.

Veal Cutlets.—Take cutlets and partly cook, then dip in a beaten egg and roll in bread crumbs. Fry brown in lard and butter. When cooked, remove, and put a little water in the pan, thicken with teaspoon of flour, season with butter, pepper and salt; pour over cutlets and serve.

Mis Greeno.

Veal Pot Pie.—Take three pounds of veal; put in hot water, enough to cover; cook slowly about three hours, or till tender; renew water as it boils away. It is well to plan for this the day you are baking bread. Take of raised dough for dumpling as you would for biscuit; when light steam one hour in steamer. Cook the potatoes either by themselves or with the meat for half an hour. Put meat,

potatoes and dumplings on a platter and pour over gravy. For gravy take some of the water in which the meat is cooked, thicken with flour wet in cold water. Season with butter, pepper and salt.

Mrs. C. L. Hubbard.

Veal Stew, English.—Three pounds of shoulder of veal, cut into four-inch pieces, stewed with a large onion, sliced, and a piece of salt lean and fat pork. When nearly done add salt and pepper, thicken gravy, adding a small can of button mushrooms. Stew fifteen minutes after. A little chopped parsley is an improvement.

Mrs. MacAllister.

Blanquette of Veal.—One and one-half cupfuls of cold veal cut in thin bits as large as a quarter of a dollar, half a cup of finely chopped cooked ham. Butter a sauce pan and pour in a coffee cup of cream, when it boils stir in one teaspoon of flour wet in milk; let boil till it thickens, then add the meat, pinch of nutmeg, salt and pepper to taste; lastly stir in the yolk of one egg beaten with a tablespoon of cold milk. Stir for a moment, then pour on a hot platter and garnish with hard boiled eggs and a slice of lemon.

Mrs. Hawkins.

To Bake a Ham.—Boil three hours, then take out of water, remove rind and sprinkle the top with flour rubbed with a little butter, stick cloves over and bake one hour.

Mrs. L. Whitney.

Boiled Ham.—Cover with cold water and boil slowly. A ham weighing twelve pounds will require five hours. If you wish to serve it hot, skin and sprinkle with a little sugar, sticking in cloves. Then set in the oven thirty minutes. If to be served cold, do not remove it from the water until cold.

Put weights on and let stand until it is thoroughly drained and cold.

Have ready a beaten egg, then take a tablespoon of the mixture, roll lightly between the hands into a ball. plenty of sifted crumbs on a board, roll the ball lightly on the crumbs into the shape of a cylinder, then drop in egg and roll again in the crumbs. When the lard is hot (see directions for frying), dip frying basket in lard to grease, take out and lay in the basket four croquettes and immerse in the hot fat to cook to a delicate brown. Take from the basket and place on a brown paper in the heater until ready to serve.

Note.—For frying, use good sweet lard in deep kettle. Substances which are moist, as fish balls, croquettes, oysters, corn meal mush, cold boiled rice, etc., should be first dipped in beaten egg, then rolled in sifted bread or cracker. A quantity of this can be prepared and kept ready for use. The temperature of the fat for frying should be high enough to brown a bit of bread in half a second. Use a frying basket. Pour this over potatoes, and loosen them with a fork so the cream will run through them. Bake three-quarters of an hour in a moderate oven.

Mrs. George Sabin.

Escaloped Potatoes—Raw.—Pare and slice them very thin; take as much milk as you think will cover them, and stir into this about a tablespoonful of flour—first in a little of the milk. Season the potatoes with the remainder of the salt and pepper, and stir them into the sauce. Cook for five minutes without stirring.

Note.—Many serve the last two vegetables without liquid, simply seasoning with salt, pepper and butter. It is difficult to say just how long they should cook, so much depends upon the age and the length of time they have been gathered.

Spinach.—Pick over carefully a half peck of spinach, cut off roots; wash through several waters; drain by taking up in handfuls, shaking and pressing out all the remaining water. Put in kettle; add a cupful of hot water, stand over the fire and boil until tender, about fifteen or twenty minutes. Then drain in colander, cutting fine with knife. Some like it chopped very fine. Succotash.—Remove the corn from the cob, and an hour and a half before dinner put the cobs, with a few shelled beans, into cold water to boil; after one hour take out the cobs, put in the corn, and boil half an hour. There should be no more water at first than will be necessary to make the succotash of the right thickness, as having too much occasions a loss of richness imparted by the cobs. Before you take up, add butter, pepper and salt. This is a much better way than to boil the corn on the cob and then cut it off.

Mrs. A. G. Crooks.

Escaloped Onions.—Pare and slice enough onions to fill a baking dish; parboil in water till tender. Butter a dish, put in a layer of onions, sprinkle over a layer of crumbs, add salt and pepper, and a few bits of butter, then another layer of onions, etc. Continue so till the dish is full. Put on the tops and bake slowly three-quarters of an hour. Slide the cake turner under the tomatoes and lift gently on to a hot platter, garnish with parsley and serve.

Stew them about forty minutes, then add a tablespoonful of butter, salt and pepper to taste; serve hot. If desired thicken with bread crumbs.

Fried Tomatoes.—Cut firm tomatoes in thick slices. Fry them in butter until brown, being very careful not to burn. If necessary add more butter while cooking; season with salt and pepper. Remove tomatoes to a hot platter and pour into the pan one cup of cream, when hot add carefully the beaten yolks of two eggs; take at once from the stove and pour over the tomatoes. Milk thickened with a little flour may be used instead of cream, adding a little butter. This is a good luncheon dish.

Butter a dish and put in a layer of macaroni, cheese, some tomato, a little onion, some stock, butter, salt and pepper. When carefully done in this way each kernel stands out by itself, while it is perfectly tender.

Boiled Rice.—Put two quarts of boiling water into a stew pan; when the water boils hard pour in a cup of thoroughly washed rice and a good pinch of salt; let it boil hard for fifteen minutes, shaking the pan occasionally. Try the grain and if soft pour into a colander immediately and put it under the cold water faucet, shaking it well; put it back on the range and cover until ready to serve.

Fill each one with a stuffing made of equal parts of softened bread crumbs and minced meat (chicken or veal preferred), well seasoned with salt, butter and a few drops of onion juice. Place in a baking dish with stock about one inch deep. Bake in a moderate oven one half hour. Some prefer it without onion.

Mrs. Beman.

Boston Baked Beans.—To one pint of dry beans allow a full half pound of pork, a large spoonful of molasses, one teaspoon each of salt, sugar and mustard. Soak the beans over night; in the morning put them in fresh water and simmer until tender, but do not let them break to pieces; skim them out of this water into a quart bean pot. Mix molasses, sugar, etc., together in hot water enough to fill the pot; cut the rind of pork in squares and put it with the beans; as the water cooks away fill the pot with more, adding the last water within three hours of serving. *Cook slowly* from eight to ten hours, or longer.

Mrs. George Noyes.

Pork and Beans.—Two quarts of beans, soaked in water over night; in the morning, parboil them until tender; drain through a colander; boil a pound and a half of pork in three pints of water for half an hour. Corn Cakes.—One dozen ears of grated corn, five tablespoonfuls of thick sweet cream, two tablespoonfuls of flour, yolks of two eggs, whites of three well-beaten eggs with a little salt. This batter can be dropped into hot lard and fried, thus making corn fritters.

Mrs. Ralph.

SALADS.

"It is a Spanish proverb that four persons are necessary for the proper preparation of salad—a spendthrift for oil, a miser for vinegar, a counsellor for salt, and a madman to stir it."

Note.—A salad should come to the table fresh and crisp.

All kinds of meats and fish used for salads should be cut in small pieces and set on the ice in a marinade of two teaspoonfuls of vinegar, one of oil, one of salt, and one-fourth teaspoonful of white pepper. The French Dressing may be used as a marinade.

Rubbing a cut onion around the inside of a salad bowl is sufficient when only a slight onion flavor is desired. Lettuce should never be cut, but broken or torn apart.

The garnishes should be of the lightest and freshest kind. In arranging a salad, handle it very lightly and never use pressure to get it into form. The white leaves of the celery, the small leaves from the heart of a lettuce head, or the new leaves of the nasturtium, make pretty garnishes. Small round radishes may be arranged in a dish with lettuce salad; points of pickled beets or of lemons made by quartering slices of either, may be placed at the base of a salad; and wild roses, buttercups, nasturtiums and water-cresses are suitable for garnishes, if not used too freely.

Tarragon Vinegar for Salad Dressing.—Put green tarragon in a bottle, fill it with cider vinegar, place in a sauce pan of cold water and let it gradually come to a boil. Remove and cork.

Mrs. Beman.

Cooked Mayonnaise Dressing.—Add the well-beaten yolks of five eggs to five tablespoonfuls of vinegar, cook until stiff, be careful to stir clean from the sides of the bowl while cooking. Remove from the fire, add one tablespoonful of butter and stir until cool and perfectly mixed. When quite cold season to taste with salt, pepper (also mustard when making this dressing for cabbage salad), then with whipped cream to the required consistency, just before using.

Mrs. Edward Lawrence.

SALADS 57

Mayonnaise Dressing, No. 1.—For three persons take the yolk of one egg, beaten very stiff; add oil slowly until very stiff; then add two teaspoonfuls of powdered mustard; salt and pepper to taste; after this, one tablespoonful of vinegar, and last of all the whites of two well-beaten eggs. If it should curdle, beat in another egg very slowly. Use egg beater.

Mrs. Calvin Skinner.

Mayonnaise Dressing, No. 2.—To the yolks of three or four eggs, raw, add a few drops of oil at a time, alternating with an occasional drop of lemon; stir constantly in a deep bowl, with a wooden spoon, in one direction; stir constantly, and add the oil gradually, putting in the lemon when it tastes of too much oil; add, at last, a little salt, mustard and red pepper. To three or four eggs, add half a bottle of oil, to one and one half lemons; a whole bottle to three lemons. When finished it should be thick and creamy.

Mrs. L. C. Wead.

Mayonnaise Dressing, No. 3.—To the yolks of three eggs (raw) add a little oil, a pinch of salt, beat with silver fork on platter until it thickens. Repeat this until you have it salt enough and quite thick (as the vinegar will thin it). Add the oil gradually, beating all of the time. Add at last juice of lemon or vinegar with a little mustard and red pepper to taste. Then add two tablespoonfuls of cream, whipped. Put in a cool place until ready to use.

Mrs. Breed.

Cream Dressing, No. 1.—Two eggs, one teaspoonful of salt, one-fourth of a teaspoonful of mustard, one-fourth of a teaspoonful of white pepper. Butter the size of a lemon. Then I put in salt, pepper, a little vinegar and a good deal of oil and mix thoroughly together. I then taste of it and if it doesn't taste just as I like it, I add salt or oil or whatever it seems to need. In their season I add thinly sliced cucumbers." Keene Valley.

EGGS.

"O, egg! within thine oval shell What palate-tickling joys do dwell."

Eggs should be boiled by putting into cold water. Gradually bring the kettle to a strong heat. When the water comes to a boil, it is sufficient for rare eggs. For hard boiled, twenty minutes should be given.

To Shaker Eggs.—Boil four minutes; take from the water; let stand long enough to cool sufficiently to handle; remove the shell, keeping the eggs from breaking by taking the skin with the shell; as fast as you get them ready, drop into a covered dish to keep hot; then add butter, pepper, salt, and a spoonful or two of sweet cream; dress it over the eggs, and serve for lunch or tea in side dishes.

Mrs. J. S. Phillips.

Scrambled Eggs.—Put a tablespoonful of butter into a hot frying pan, have ready half a dozen eggs broken in a bowl, mixed slightly. Turn them into the hot butter and stir briskly one way until they are cooked. Be careful that they do not get too hard. Many add a little milk to the eggs.

Creamed Eggs.—Boil six eggs twenty minutes. Make one pint of cream sauce. Have six slices of toast on a hot dish. Put a layer of sauce on each, then the whites of the eggs, cut in thin strips; and over this the yolks rubbed through a sieve. Place in the oven for about three minutes. Garnish with parsley and serve.

Miss M. E. Parmelee.

Egg Timbales.—Beat eight eggs without separating, add one rounded teaspoonful of salt, one-half of a teaspoonful of white pepper, one tablespoonful of chopped parsley, one teaspoonful of onion juice and a pint and a half of milk. Stir nicely together and fill small buttered timbale molds two-thirds full. Set the molds in

EGGS 67

a deep pan partly filled with water, covered with buttered paper and place in a moderate oven until firm in the center, which will take from ten to twenty minutes. Serve with tomato sauce.

Mrs. McClary.

Eggs à la Newburg.—Boil hard four eggs, throw them into cold water for a minute and then remove the shells. Cut into halves and arrange on a heated platter, white side up. Put into a sauce pan one tablespoonful of butter and one of flour. When creamed add two-thirds of a cup of hot milk. When boiling take from the fire, add the well-beaten yolks of two eggs, bring to a scalding point again, add a small teaspoonful of salt, a dust of cayenne.

Lucy King Allen.

Baked Eggs.—For six people use eight eggs, one cupful of milk, one generous tablespoonful of butter, one teaspoonful of flour, half a teaspoonful of salt, pepper to taste, and one teaspoonful of chopped parsley. Put the butter in a frying pan, when melted put in the flour and stir until smooth and frothy; draw the pan back, and add gradually the cold milk, then the seasoning, after boiling up once, pour the sauce into a deep plate. Break the eggs carefully and drop into the sauce, and sprinkle over parsley. Place in a moderate oven and bake till the whites are set, say five minutes. Serve immediately, in the dish in which they are baked.

Mrs. Breed.

Omelet—Five eggs, beaten separately; five tablespoonfuls of milk; to the yolks add the milk, a pinch of salt, then the whites, beaten lightly; have your omelet pan ready with a large table-spoonful of melted butter; cook carefully on the top of the stove, and when well set put it in the oven to brown; fold it, and serve. Some say the salt should not be put in, as it takes from the lightness of the eggs.

William H. Barney.

Asparagus Omelet.—Boil two pounds of asparagus in a little water with a little salt, or steam until tender; chop fine; mix with five yolks and three whites of eggs well beaten; add two tablespoons of sweet cream; fry, and serve hot.

Mrs. C. L. Hubbard.

68 EGGS

Bread Omelet.—Soak a teacup of bread crumbs in a cup of sweet, milk over night; three eggs beaten separately; yolks with the bread and milk; stir in the whites, and fry brown; sprinkle over salt and pepper just before taking up. Sufficient for six persons.

Miss W. Childs.

Meat Omelet.—Beat six eggs quite light; have ready minced meat of ham, tongue, cold chicken or veal; put this into a dish with a little butter to warm through, but not fry; turn the eggs into a spider in which you have previously heated the butter; let the omelet brown lightly on the lower side, and the upper forming a thin custard; season to taste; put in the meat; fold the omelet over, and take up quickly; serve immediately.

Mrs. Farnham.

Poached or Dropped Eggs.—Have one quart of boiling water and one tablespoonful of salt in a frying pan. Break the eggs, one by one, into a saucer and slide carefully into the salted water. Dash with a spoon a little water over the egg to keep the top white. The beauty of a poached egg is for the yolk to be seen blushing through the white, which should be only just sufficiently hardened to form a transparent veil for the egg. Cook until the white is firm and lift out with a griddle cake turner, and serve immediately. Muffin rings may be placed in the water and an egg dropped into each ring.

Mrs. Belding.

Eggs with Tomato Sauce.—One-half of a small onion sliced, fried in half a tablespoon of butter. Add one-half a can of tomatoes, two cloves, salt, pepper, one tablespoon of flour rubbed with one-half a tablespoon of butter. When thick pour into a deep platter, drop on the sauce poached eggs and serve. This sauce is sufficient for six eggs. With graham gems this makes a nice course by itself.

Mrs. Breed.

Deviled Eggs.—Put five eggs into cold water and boil twenty minutes, then put into cold water. When cool remove the shells and cut in two lengthwise. Take out the yolks and press through a sieve. Add one tablespoonful of olive oil or butter, salt, pepper, mustard and vinegar to taste. Fill the whites with the mixture.

EGGS 69

Eggs Stuffed with Sardines.—Boil twelve eggs steadily for fifteen minutes, then cover with cold water and set aside to cool. Cut a small slice off each egg large enough to remove the yolks without breaking the white. Take one medium sized can of boneless sardines, mash to a paste with the yolks of the eggs, add a little salt and the juice of a fresh lemon. Refill the whites and arrange the eggs in a nest of lettuce leaves.

Mabel Lawrence.

Scalloped Eggs.—One tablespoonful of corn starch, one tablespoonful of butter, one saltspoon of salt, one pinch of red pepper. Put these into one pint of boiling cream and stir until thick and smooth. Pour this sauce over one-half dozen deviled eggs, and bake lightly.

Lucia F. Gilbert.

Egg Puffs for Tea.—Break as many eggs as would be required, keeping the yolks each in a separate dish, add salt to the whites and whip; butter an iron griddle on which drop a spoonful of the whip, them place a yolk on each one. Season with salt and pepper, cover with whip, and when a nice brown, turn with a pan cake turner, brown and take up. Do not have the griddle too hot.

Mrs. F. E. Taylor.

Scotch Woodcock.—One tablespoon each of flour and butter rubbed together, six or seven hard boiled eggs chopped fine, one pint of milk, one small teaspoonful of anchovy paste, a little mustard. Serve on small squares of buttered toast.

Mrs. Frank Haven.

CHEESE DISHES AND SANDWICHES.

"Bachelor's fare—bread and cheese and kisses."—Swift, Polite Conversations, I.

Cheese Straws, No. 1.—Roll puff paste thin, sprinkle well with grated cheese and a little cayenne pepper, fold, roll out and repeat the process. Let it stand in a cool place for a time; then roll very thin; cut strips about one-fourth of an inch wide and three inches long and the same number of small rings. Bake in a slow oven ten or fifteen minutes. When done hang the rings on the sticks; the rings may be omitted and the sticks piled cob-house fashion on a fancy plate. Serve hot or cold as a course at dinner, or with the salad, or whenever a cheese course is allowable.

Cheese Straws, No. 2.—One cup of grated cheese, two table-spoonfuls of melted butter, yolk of one egg, a pinch of salt, a dash of cayenne pepper, two tablespoonfuls of cold water, one-half teaspoon of baking powder, one-half cup of flour. Roll and cut in strips and bake to a nice brown.

Mrs. S. T. Carpenter.

Cheese Fondu.—Melt two tablespoons of butter, add four tablespoons of flour and mix until smooth. Add one cup of milk or cream, stir continually until it cooks and becomes quite thick; take from the fire and add the beaten yolks of three eggs. Mix throughly, then add four tablespoons of grated parmesan cheese. Salt and pepper to taste. Beat the whites of the eggs to a stiff dry froth, add carefully to the mixture; butter a baking dish and bake in a quick oven twenty-five minutes or it may be put in soufflé dishes and baked ten minutes.

Litz Dustin.

Cheese Ramakins.—Put two ounces of bread and a gill of milk over the fire; when hot add two tablespoons of butter, four heaping tablespoons of grated cheese (more if domestic cheese is used) and a dash of red pepper; take from the fire and add the yolks of two eggs and the well-beaten whites of three. Turn into ramakin dishes and bake in a quick oven ten minutes.

Mrs. Breed.

Croutons with Cheese.—Cut slices of bread about one-half an inch thick and remove crusts. Then cut in any shape desired and toast a delicate brown. Have ready a cheese sauce made as follows: Scald half a pint of milk; rub one generous tablespoon of butter and two tablespoons of flour together and stir into the milk. Stir until it thickens, add yolk of one egg, two large tablespoons of grated cheese and a palatable seasoning of white pepper and salt. Put a large teaspoon of the sauce on a crouton and serve with cream soups or salads.

Mrs. J. E. Taylor.

Cottage Cheese, No. 1.—Take a pan of curdled milk and set on the stove or over hot water, heat thoroughly, but do not scald. Put a cheese cloth in the colander and pour in the curd. When well drained or slightly squeezed add a little salt and moisten with sweet cream. Make into balls.

Mrs. W. C. Orcutt.

Cottage Cheese, No. 2.—Have a pan half full of thick, sour milk, fill the pan with boiling water and let it stand two or three minutes, then drain in a colander pressed with a plate and a weight over it for a while, then add salt and cream or butter, and a little sage; make into balls.

Mrs. McClary.

Welsh Rarebit.—In a sauce pan put one-half of a cupful of milk and set over the fire; when hot add two cupfuls of grated or chopped rich cheese and stir until it melts. Add quickly one teaspoonful of made mustard, one-quarter of a teaspoonful of salt, one-half of a teaspoonful of paprika or a dash of cayenne and two well-beaten eggs. Stir for a moment until the mixture begins to thicken, pour over toast and serve at once.

Table Talk.

Sandwiches may be made of white, graham or brown bread and should be of fine grain and a day old. When the bread is ready, the butter should be spread on the loaf, and then a slice cut off evenly.

"They who have little butter must be content to spread thin their bread."

Lettuce Sandwiches.—Spread the bread with mayonnaise dressing. Put between the slices from which the crust should be cut, small crisp lettuce leaves. Trim and shape the sandwiches before putting in the lettuce that it may not have to be cut. Serve as soon as possible after preparing.

Mrs. J. E. Taylor.

Celery Sandwiches.—Cut the celery fine and mix with a little ice. Butter the bread; dry the celery on a cloth; mix with mayonnaise; spread it on the slice, cover it with another, and cut into the desired shape.

Egg Sandwiches.—Put the eggs into cold water, bring gradually to the boiling point and boil for forty-five minutes. This long boiling makes the yolks very mealy. Put into cold water, when cool remove the shells and put through a potato press or fine sieve. To each egg allow one-half teaspoonful of soft butter, a little vinegar, pepper and salt to taste. Mix to a paste; spread on the bread and use small crisp lettuce leaves between the slices.

Mrs. J. E. Taylor.

Watercress Sandwiches.—Wash the cress and dry in a cloth. Pick the leaves from the stems and season with salt. Lay the cress thickly on the buttered slice, cover with the other and press together.

Spanish Sandwiches.—Spread buttered graham bread with mustard; then with a layer of cottage cheese; and then with a layer of chopped olives mixed with mayonnaise.

Cheese Sandwiches.—Cream one roll of Neufchatel cheese. If a little hard, as it is apt to be, put in it a spoonful of milk or cream. Add a little salt and a dash of red pepper or paprika. Paprika, by the way, should always be used with cheese, as it develops the flavor better than any other pepper. Mix with the cheese half a cup of chopped or pounded nuts and spread on slices of rye, graham, whole wheat or Boston brown bread. The mixture loses half its delicious flavor if spread on white bread, and the brown breads are much more nourishing. Rye is the bread par excellence to use with this filling, a rye sandwich of this kind being enticingly appetizing.

Sardine Sandwiches.—One small box of sardines, yolk of one hard boiled egg, juice of one lemon and a little cayenne. Drain the sardines, remove skin and bones and mash with a fork. Add the egg yolk rubbed through a sieve, the lemon juice, cayenne and enough melted butter to make a paste. Do not butter the bread, but spread the paste directly on it.

Nut Sandwiches.—Chop the nuts very fine, making a mixture of one-half almonds, one-quarter English walnuts and the remainder hickory nuts. Butter the bread, slice, put on it a thin layer of the chopped nuts, a dust of salt, a sprinkle of grated cheese and cover with another slice.

Peanut Sandwiches.—Take one quart of freshly roasted peanuts, remove the outer shells and the inner red skins and pound to a paste. Add sufficient mayonnaise to enable you to spread it on the loaf, then cut in thin slices and press together.

Olive Sandwiches.—Butter slightly round thin slices of bread; lay between each sandwich one or two lettuce leaves and sliced olives, very thin, which have been prepared a few hours and kept on ice. Cover the lettuce and olives with cream salad dressing. Serve as soon as possible after preparing.

E. McClary.

Ham Sandwiches.—Chop cold boiled ham very fine, and to every cupful allow one tablespoonful of melted butter, the yolks of two hard boiled eggs, one teaspoonful of lemon juice, one-fourth of a teaspoon of dry mustard and one-fourth of a teaspoon of paprika. Pound all to a paste.

Cheese for Crackers or Sandwiches.—One-quarter of a pound of cheese cut in small pieces and put into a double boiler; add one-quarter of a teaspoon of salt, same of mustard, pinch of cayenne pepper, small piece of butter, one egg and one-half cup of milk. Allow the cheese to melt, mix egg, milk and other ingredients, add to the cheese, cook to the consistency of thick cream. This will curdle if cooked too long. Use cold.

Mrs. E. G. Mason.

Sweet sandwiches are often served at five o'clock teas. They are made from preserved fruits or figs, dates, etc. When made of the latter, the fruit must be chopped fine and moistened with orange or lemon juice. The fruits may be used separately or mixed, using those that blend. Cut the bread in fancy shapes, spreading the fruit thin. Nut sandwiches are best served with meat salads.

Orange Marmalade Sandwiches.—Toast, butter and spread with marmalade thin slices of bread. Place two together, cut in strips one inch wide. Serve hot.

BREAD, BREAKFAST AND TEA CAKES.

"Now for the tea of our host,
Now for the rollicking bun,
Now for the mustins and toast,
And now for the gay Sally Lunn."

Hint for Making Bread.—During the cold weather all flour should be thoroughly warmed before mixing. Frost-bitten or chilled yeast will surely make black bread, and the fresher the yeast is the better the bread will be. The dough should be thoroughly kneaded, and care taken that it does not get chilled during the process of rising.

Ladd & Smallman.

Yeast.—Take six good-sized potatoes, pare and grate them; steep a small handful of hops in one pint of water and pour over the potatoes; then turn on boiling water until it thickens; add one-half cup of sugar, one tablespoonful of salt, one of ginger. When luke warm add one cupful of good yeast. This will make one gallon of yeast.

Mrs. E. A. Webster.

Bread.—One and one-half quarts of luke warm water, into which put one heaping tablespoon of sugar, add a little flour, and beat well; then stir in three-fourths of a cup of yeast, and enough flour to make a thick batter (in summer make a little thicker) and give it a good beating. In the morning add one tablespoon of mixed melted butter and lard, and an even tablespoon of salt, then add all of the flour necessary to knead; knead the dough sufficiently to work in the flour, then let it remain on the board covered by a pan until it rises some, perhaps fifteen or twenty minutes (by doing this it is much easier to knead into velvety and elastic dough); then knead about ten minutes and let rise until double its bulk. Then knead just enough to take out the air bubbles and put in the tins, let rise and when ready bake in a moderate oven.

Bread.—Take one pint of milk, one tablespoon each of butter and lard and let come to a boil; add one pint of water, tablespoon of sugar, salt, a yeast cake or one cup of home-made yeast; flour enough to mould from one-half to three-quarters of an hour. Knead as little as possible in the morning; shape into loaves and let rise before baking.

Mrs. L. C. Wead.

Franch Bread.—One pint of milk, six eggs, one-half cup of butter, two-thirds of a cup of sugar, one-half cup of yeast, flour enough to knead all together. In the morning knead again; cut in strips, braid and when light bake.

Mrs. Ralph.

Parker House Rolls.—Scald one pint of sweet milk, and when partly cooled melt in it one-half cup of white sugar and one table-spoon of lard or butter. When luke warm add one-half cup of yeast and place the mixture in the center of two quarts of flour. If for tea, set to rise early in the morning. When light mix and knead thoroughly, let rise again, then knead again for ten or fifteen minutes, then roll out thinner than for biscuit, cut out as for biscuit, and spread butter over half the surface, fold it upon the other, place upon tins so as not to touch each other. Let it rise again, and when light bake fifteen or twenty minutes.

Miss H. E. Keeler.

Meacham Rolls.—One cup of warm milk, one-fourth cup of butter, two tablespoons of sugar, one-fourth of a small cup of yeast, flour to knead at night softly and in the morning turn carefully on to the moulding board and roll out one-half inch thick; cut with biscuit cutter and spread with warm butter, fold these over half way; let rise very light and bake. If warm rolls are desired for supper leave the dough in a cool place until about three o'clock and then roll and cut as stated. The above makes eighteen rolls.

Mabel Earle Selkirk.

Cinnamon Rolls.—Take from bread dough in the morning the amount required for one medium loaf of bread and mix in one-half

cup of soft butter, put in a cool place until about three o'clock in the afternoon, then roll out thin and spread with warm butter and sugar. Sprinkle with cinnamon; then cut off strips three inches wide, and roll over until one and one-half inches in width; cut off slices and place in long gem tins to rise very light. Bake in a medium hot oven. For lemon rolls turn a little lemon extract into your hand and rub with the sugar and butter over the dough and then roll and cut the same as for the cinnamon rolls.

Mabel Earle Selkirk.

Rolls.—One quart of sweet milk, three eggs, one cup of butter, one-half cup of sugar, two-thirds cup of yeast, flour for a thick batter. Let remain over night and mix for rolls as biscuit in the morning.

Mrs. D. F. Soper.

Breakfast Rolls.—One quart of flour, a pinch of salt, butter the size of an egg rubbed in the flour, one-half cup of baker's yeast or one-fourth home-made yeast; mix with water and knead hard. Let it rise over night. In the morning make into rolls and let rise again. Bake twenty minutes. Mrs. F. J. Seaver.

Rolls for Tea.—One egg, one-half cup of butter, scant, one-half cup of sugar, one cup of milk, three teaspoonfuls of baking powder; flour enough to stiffen, so that it will drop from a spoon into hot gem pans. Bake in a very quick oven. The same recipe makes good graham rolls for breakfast, omitting the sugar.

Mrs. J. E. Barry.

Finger Rolls.—Use any good recipe for rolls, and when ready to put in the tins take off pieces about the size of an egg and shape into narrow rolls about four inches long and place in tins. If a crust is liked all around place an inch apart, when light bake in a quick oven.

Crescents or Horse-Shoe Rolls.—Use recipe for Parker House rolls. When ready to put in tins roll the dough out to about one-half an inch in thickness, spread lightly with butter and cut in six-inch

squares, then each square across, making two triangles; commence at the longest side and roll towards the point and fasten, then bend in crescent shape and place on tins a little ways apart. When light bake in a quick oven and just before they are done brush lightly with a little sweet milk.

Bread Sticks.—Scald one pint of milk and while hot add two ounces of butter. When luke warm add a teaspoon of salt, one of sugar, and about one quart of sifted flour. Beat vigorously for five minutes, add a half yeast cake dissolved in half a cup of luke warm water, or half a cup of good yeast. Mix, cover and stand in a warm place over night. In the morning add the white of an egg beaten to a stiff froth, and sufficient flour to make a soft dough. Knead for five minutes, then pound until soft and velvety. Put back in a bowl until very light, then take a very small piece of the dough and roll it out into a long strip about the size of a thick lead pencil. Place on greased pans, when light brush them with a little white of an egg and water mixed, and bake in a quick oven ten or fifteen minutes.

Table Talk.

Raised Biscuit.—One pint of sweet milk, one-half cup of butter, one cup of home-made yeast, one tablespoon of sugar. Let the butter, milk and sugar come to the boiling point, then cool, sponge and add flour and the yeast. Let rise three times. This rule makes about one dozen and a half biscuits.

Mrs. F. W. Lawrence.

French Rolls.—Three cups of sweet milk, a teaspoonful of salt, one-half cup of yeast or half a cake of compressed yeast, one cup of melted butter, add flour enough to make a stiff dough. Let it rise—better over night—and then add two well-beaten eggs; knead thoroughly, and let rise again. Make into balls about the size of an egg, then roll between the hands to make long rolls (about three inches). Place close together in two even rows on well-buttered pans. Cover and let rise again. Bake in a quick oven to a delicate brown.

Mrs. T. Hawley.

Whole Wheat Bread.—Scald one cup of milk, add a teaspoon of butter, one of sugar, one of salt, and one cup of water. When luke warm add one-half a yeast cake dissolved in one-half cup of water; stir in three cups of whole wheat flour, and beat until light and smooth; let rise over night. In the morning add two or three cups of flour or enough to make a soft dough. Knead well and be careful not to add too much flour; let it rise till double its bulk. Shape into loaves. Put in tins and let rise. Bake forty-five minutes in a moderate oven.

Buns.—One pint of sweet milk; one-half cup of yeast; half a cup of shortening; two-thirds of a cup of sugar; one small teaspoon of salt; raisins or English currants. Knead with flour to make the proper consistency.

Mrs. Clinton Stevens.

German Coffee Cakes.—Add half a cup of butter to a pint of luke warm milk, sift enough bread flour with a teaspoon of salt to make a batter as stiff as you can stir. Beat in half a cup of homemade yeast or half a yeast cake, and a cup of sugar, add two eggs and beat the batter until it blisters. In summer the dough should rise from eight to ten hours. In the morning add merely enough flour to roll out the dough. Let it rise two hours, then roll out until it is a little less than half an inch thick, cut into small cakes and let rise one-half hour, then bake for about twenty minutes in a quick oven. When they are cooled a little, break in halves and pile with their soft side up in a large dripping pan. Put them in a hot air oven for a day or two to become thoroughly dry.

Florence C. Mallon.

FILLINGS FOR LAYER CAKES.

A "Wilderness of Sweets."-Paradise Lost.

Note.—Care is necessary in the preparation of syrup for icings, etc. Confectioners recognize six or eight degrees in boiling sugar, but for our purposes a knowledge of three will be enough—the second degree or "thread;" the fourth or "ball;" and the sixth or "fruit glacé." One cup of granulated sugar and one-half cup of water will boil to "the thread" in ten or fifteen minutes; to the "ball" in twenty minutes; and a little longer is necessary for a "fruit glacé." Test by dipping the thumb and forefinger in cold water and taking a drop of syrup between them and drawing apart. If it threads the second degree is reached; when it forms a soft ball by rolling between the thumb and finger we have the fourth degree; and when the syrup dropped in cold water is brittle, the sixth degree is reached.

Boiled Frosting.—Take one pound of granulated sugar, put in a pail and pour over just enough boiling water to dissolve; set in a kettle of water; beat the whites of three eggs a very little; put into the pail and beat until it thickens; remove from the stove and beat until cold. This is sufficient for a layer cake and a loaf.

Slice the pears very thin after paring, grate the rind of the lemons and slice them very thin, bruise the ginger root, put all together and boil slowly three or four hours or until thick.

Mrs. M. H. Bigelow.

Preserved Peaches.—Pare the peaches. For every pound of fruit take three-fourths of a pound of sugar. Make a syrup with one cup of water to each pound of sugar; boil and skim. Add the peaches and cook until they look clear and transparent. Fill the cans at once. Preserved peaches are much better left whole, especially if the flavor of the pits is liked.

Mrs. Hawkins.

Cherries.—Allow one-half or three-quarters pound of sugar to one of fruit. Make a syrup of one-half pint of water to three pounds of sugar. Pit the cherries, leaving in a few stones to flavor the fruit. Cook and seal as usual.

Preserved Apple and Ginger.—To one pound of chopped, sour apples allow one pound of sugar; to every two pounds of sugar, two lemons and one-half ounce of ginger root. Chop the lemons, grate the ginger root. Put all together and cook slowly two and one-half hours.

Mrs. Hawkins.

Grape Preserves.—Press the pulp from the skins; put the pulps in a preserving kettle and boil them a few moments, then strain through a colander to separate the seeds—add the pulp to the skins and weigh; allow three-fourths of a pound of sugar to one pound of fruit. Cook slowly from one-half to three-fourths of an hour.

Preserved Plums.—Preserve plums the same as peaches. Remove the skin from them or not; if left on it is likely to crack open and come off if boiled too long. To prevent this, in a measure, prick the plums in several places with a fork before cooking.

Mrs. Belding.

Pineapple.—Grate or chop the pineapples fine. For each pound of fruit add three-fourths of a pound of sugar. Boil ten minutes and then can. This is nice for sherbet or punch.

Mrs. McClary.

Mock Pineapple.—Take partially ripe watermelons, pare and cut in small squares and steam until tender. Make a rich syrup of white sugar, and put in enough fresh or canned pineapple for flavoring, simmer ten minutes, then add the watermelon and simmer fifteen minutes more. Can while hot.

Mrs. Nellie Graham.

Currants and Fruit.—Six pounds each of currants and sugar, three large oranges, one and one-half pounds of raisins. Mash the currants and cook slowly one-half hour, then add the juice, pulp and finally the chopped rind of oranges and cook one hour; then add the raisins which have been seeded and chopped fine. Then cook one-half hour. Now add the sugar, stirring well, and cook one-half hour, making two and one-half hours in all.

Mrs. Hawkins.

Cold Strawberries.—Pick over firm, fresh berries, rinse and drain well. To three cups of berries take two of sugar; put into a large earthen bowl; mix well and put into the refrigerator until morning; then stir well. but not deep. Take off all bubbles; put into cans; press out the air (it will take a long while), seal, wipe off the can and at once roll in two or three thicknesses of paper so no light will touch the fruit. Put in a dark cellar. Mrs. McClary.

To Can Raspberries.—Make a syrup in the proportion of one and one-half pounds of sugar to one quart of water; let it boil hard twenty-five minutes, then skim and let the syrup cool. Fill the cans with fresh garden berries, then add syrup to cover the fruit, put on the covers without rubbers and fasten; place the cans on a rack in a wash boiler; fill with water to within two inches of the top and let boil one minute. Take the cans from the water, take off the covers

and add more hot syrup if needed, put on the rubbers and covers and the next day store them in a cool dry place. All fruits may be canned in the same way, but for acid fruits like plums use two pounds of sugar to one quart of water and cook longer.

Mrs. Hawkins.

Cold Raspberry.—Put the berries in a new tin or carthen dish and jam with a potato masher; add one pound of sugar for each of fruit; stir thoroughly, and put into cold cans; seal tight. Will keep two years as fresh as when canned.

Mrs. McClary.

Canned Peaches.—Pare and place them on a plate in the steamer over boiling water, keeping them tightly covered; steam till they can be easily pierced with a fork; put them into heated cans, keeping the cans in hot water until sealed; make a syrup in the proportion of one pint of water to each pound and a half of sugar, and allowing three-quarters of a pound of sugar to each of fruit. Pour over the fruit the hot syrup and seal. Pears put up the same way allowing but one-half pound of sugar for each of fruit. Mrs. McClary.

Gooseberries or Currants.—Four pounds of fruit, three of sugar, one pint of water; cook until they commence to break. This quantity will fill four pint cans.

Mrs. George Sabin.

Currants, Cold.—To one pound of fruit allow one of sugar. Mash the currants, stir in the sugar thoroughly and let stand over night; in the morning put into cold glass cans, fill to overflowing, put on the rubbers and seal.

Baked Apple Sauce.—One cup of sugar and one quart of apples pared and cut in quarters. Bake in a stone jar in the oven one and one-half or two hours.

Mrs. McClary.

Canned Apple Sauce.—In the fall take ripe apples, pare, core and cook to a pulp; while hot fill the cans full—shaking the cans to settle the apple; seal when hot. For pies in the winter.

To Can Tomatoes, No. 1.—Pare firm medium-sized tomatoes cold, then place them in a colander, cover and place over a kettle of boiling water, do not let it touch the water, steam until thoroughly heated, perhaps fifteen or twenty minutes. Have some sliced tomatoes cooking. Put the whole tomatoes in hot jars and fill with the strained juice from the cooked tomatoes. Seal.

To Can Tomatoes, No. 2.—Scald the tomatoes; peal and slice; put in a porcelain kettle and boil thirty minutes or longer (some prefer them only well heated, others like most of the water evaporated). Put them boiling hot into the jars; put on the rubbers and lids and fasten, and when cold keep in a dry, dark closet.

Canned Corn.—Select fresh corn, shave one layer from the ear and then press out the rest of the pulp with the knife; fill the cans with the corn, packing it solidly (cob may be used for this) to break any air bubbles; fill the cans so the milk will flow over the tops; put on the rubbers and lids—not screwing perfectly tight. Put a rack in the bottom of a wash boiler, put in the cans and pour in sufficient cold water to nearly cover. Put on the cover of the boiler and boil steadily for three hours. Then remove the cans and tighten the covers and when perfectly cold put in a dark dry place.

Excellent Recipe for Currant Jelly, No. 1.—Coddle the currants, squeeze out the juice and put it into the preserving kettle. Boil briskly, take off the scum, add the sifted sugar and stir till it is melted. Instantly it is melted put it in the pots and set it to cool. You must not boil it a minute after the sugar is melted or you spoil the color and flavor. To every pint of juice put a pound of sugar and not one scrap over or your jelly will be spoiled.

Mrs. Roosevelt (President's mother).

Currant Jelly, No. 2.—To one heaping quart of fruit put a small half cup of water. Put the fruit in a preserving kettle and cook to a pulp; then put in a bag and drain—do not squeeze. To each pint of juice allow one pound of sugar. Cook from three to eight minutes.

Mrs. Jane Jones.

Currant Jelly, No. 3.—Use when they first ripen; jam them and drain through a bag twice without squeezing; allow a pound of sugar for a pound of juice; when the juice boils put in the sugar and let it thicken; then pour into glasses.

Mrs. R. D. Huntington.

Spiced Jelly.—To one quart of currant jelly add one teaspoonful of cinnamon and one-half teaspoonful of cloves.

Grape Jelly.—Take grapes before they are thoroughly ripe, put them in a porcelain kettle and mash with a spoon; when soft put in a bag and press out the juice. Allow a pound of sugar to a pint of juice; boil the juice twenty minutes; put in the sugar and stir till dissolved and boil a moment. If the fruit is over ripe it will never be a firm jelly. It is difficult to make jelly of some grapes but sour apple juice added will make the jelly firmer. Mrs. Hawkins.

Crab Apple Jelly.—Remove the stems and blossoms from the fruit; cut in two and put in a porcelain kettle with water to nearly cover; cook until soft; put in a flannel bag and drain; for each pint of juice allow one pound of sugar; boil the juice ten or fifteen minutes; skim thoroughly; heat the sugar in the oven and add to the juice, then let it just come to a boil and strain into glasses.

Mrs. Brennan.

Note.—Transcendent apple makes the best jelly.

Other Jellies.—Jellies can be made from quinces, peaches and plums by following the directions for crab apple jelly.

Marmalade.—Cut up peaches, crab apples or quinces without paring, cover with water and boil until tender; rub through a sieve and to every pint of pulp add one pint of sugar; boil two hours, stirring often.

Crab Apple Marmalade.—Partly peal the apples, then quarter and core them. Use one pound of sugar to a pound of fruit and let stand together over night. In the morning put on the stove and let come to a boil; then set back and let it simmer for three hours, stirring occasionally. To every eight or ten pounds of fruit add, when you put on the stove, two cut-up lemons. Take the crab apples when they are first ripe and juicy.

Mrs. W. H. King.

Orange Marmalade, No. 1.—Six oranges and three lemons sliced very thin. Add one quart of water to each pound of fruit and set away for a day in an earthen bowl or jar; then cook till tender and weigh, and allow to each pound one pound of sugar. Boil slowly until it thickens. Makes about twelve glasses.

Mrs. Hawkins.

Orange Marmalade, No. 2.—Take thin skinned oranges, take out the pulp with a teaspoon and add it to the peel chopped very fine. A pound of sugar to each orange, a quart of water to every two oranges, one lemon added to every four oranges. Put the water on after the fruit is chopped and let it stand thirty-six hours. Then put on the stove and let boil (not too hard) an hour, then add the sugar and cook until the juice begins to jell when tried on a cold saucer. If the oranges are sweet do not hesitate to use more lemons.

Mrs. E. W. Knowlton.

Orange Marmalade No. 3.—Two bitter oranges, two sweet oranges, two lemons. Slice the fruit very thin, add three pounds of water to each pound of fruit. Let stand (in earthen or porcelain ware) twenty hours. Boil one hour (uncovered). Let cool, then weigh the mixture and to each pound add three-fourths of a quart of sugar. Boil one hour, then pour into glasses. Fills about twelve.

Mrs. Ransom.

Sugared Orange Peel.—Cut the peel into narrow strips with scissors. Boil in plenty of water, till tender, changing the water after the first ten minutes. Drain as dry as possible. Make a syrup of one and one-half cups of sugar and three-fourths cup of water. Put in the peel and cook slowly until the syrup is absorbed. Spread on a flat dish and sprinkle over it a handful or two of powdered sugar.

Mrs. Shaw.

Candied Orange Peel.—Soak the peel of the oranges over night in salt and water, one-half teaspoonful of salt to one quart of water. Drain this brine off and put on fresh water enough to rinse the peel. Cut the peel into narrow strips and boil in three waters until tender. After draining off the last water, boil in a syrup made of the same amount of sugar as fruit. When the peel has entirely absorbed this syrup it will be crystalized and ready to eat.

Mrs. Wallace C. Short.

Frosted Fruit.—Dip the fruit in the beaten whites of eggs; then in pulverized sugar; put white paper in tins and lay on the fruit to dry in a very cool oven.

Mrs. R. D. Huntington.

Note.—In canning fruit use the extra juice that cannot be put into the jars to make a jelly. Add enough dissolved gelatine to the juice to make it mould when cold; serve it with whipped cream and you have a delicious dessert.

COFFEE, TEA AND OTHER BEVERAGES.

"Though we eat little flesh and drink no wine, Yet let's be merry: we'll have tea and toast."

Coffee.—Allow a heaping tablespoonful to each person and one extra; use half of one egg for six persons, and mix it with the coffee; then moisten thoroughly with cold water; just fifteen minutes before it is to be served pour on boiling water, allowing a coffee-cupful for each person and one extra; let it boil about five minutes, stirring it when the coffee rises to the top; place on the back of the stove to settle or add a tablespoonful of cold water.

Mrs. S. S. Whittelsey.

Another Way.—Prepare the coffee and egg as above, put the mixture into cold water in a tightly covered vessel, and boil five minutes, or have a pot or can that fits into the tea kettle, and steam, keeping the water in the tea kettle boiling all the time. Two-thirds Java and one-third Mocha makes a nice flavored coffee.

Coffee for One Hundred.—Take three pounds of coffee; beat in six eggs, with their shells; put in first enough cold water to mix well; then pour over boiling water; cover tight.

Mrs. Gallnow.

Tea.—For moderate strength use one teaspoonful to half a pint of water; pour on boiling water, leaving the pot standing where it will be at the boiling point yet will not boil, for from three to five minutes, keeping tightly covered.

Note.—To have first class tea, you must have freshly boiled water.

Iced Tea.—Make tea by recipe already given. Strain into an earthen pitcher and when cool set in an ice chest until wanted for use. To serve, put two lumps of sugar with cracked ice and a slice of lemon into a glass and fill with cold tea.

Iced Drinks.—Mid-summer brings compensation for heat in the many iced drinks which can be prepared from fresh fruits. simplest of these are prepared by crushing the fruit, adding sufficient sugar to sweeten and, after a few hours' maceration, pressing off the clear juice. This, before serving, is mixed with an equal amount of ice water. A small amount of lemon juice-about one tablespoonful to the pint-will intensify and improve the flavor of all fruit while a well made lemonade used in some, such as pineapple, strawberry, raspberry and current, in place of iced water, makes an agreeable drink. For those who desire iced beverages at meals, cocoa, tea or coffee may be used. The cocoa should be made with boiling water, sweetened and cooked for a few minutes, then chilled and served with cream, whipped or plain. Coffee should be clear and freshly prepared before icing, and it is usual to sweeten it slightly before cooling. Tea is steeped and strained in the orthodox manner; some prefer to serve it hot and of unusual strength, pouring it into glasses filled with cracked or crushed ice, thus chilling it instantly.

Chocolate, No. 1.—One square of W. Baker's chocolate grated, stir with this two teaspoonfuls of sugar and one tablespoonful of cold water, add one-half pint of boiling water and boil five minutes. Scald one-half pint of milk and add to the chocolate the last moment before serving. Add one small spoon of whipped cream to each cup just before it is served. For fifty medium sized cups one pound of chocolate is required, with one and one-half cups of sugar, four quarts of water, the same of milk and one pint of cream.

Mrs. McClary.

Chocolate, No. 2.—A famous Washington recipe.—Break up the chocolate and place in a warm spot to melt; put in a farina kettle and pour on boiling milk; stir while pouring in the milk and stir constantly while cooking; let it boil some minutes and serve with whipped cream.

Raspberry Shrub.—Cover the berries with vinegar and let them stand over night in an earthen bowl. Then mash them a little and strain through a bag. To every pint of juice add one pound of white sugar. Boil twenty minutes and bottle when cool. When served add the juice of one lemon to one quart of the prepared shrub.

Mrs. McClary.

Blackcap Shrub.-Made the same as raspberry.

Soda Cream.—Two and one-half pounds of white sugar, two ounces of tartaric acid—both dissolved in one quart of hot water; when cold add the beaten whites of three eggs, stirring well; flavor to taste; bottle for use. Put two tablespoonfuls of this into a glass of cold water and stir in one-fourth teaspoonful of soda.

Mrs. Willard.

Lemonade.—Good lemonade can be made with half a pint of lemon juice, three pints of water, and a generous pint of sugar. Strain; water and sugar may be boiled five minutes before adding to the juice.

Orangeade.—Oranges with lemons in the proportion of one and one-half cups of orange juice to one of lemon. Water and sugar to taste.

Punch.—For fifty punch glasses take four quarts of water and the strained juice of two dozen lemons and three oranges, one quart can of chopped pineapple, one pint bottle of stoneless cherries. Add the peel of the three oranges chopped fine. Sweeten to taste. If desired add one pint of raspberry shrub.

Mrs. S. T. Carpenter.

Fruit Punch.—The juice of eighteen lemons, one quart can of pineapple; put it together with two cups of sugar and let it stand one-half day. Then dilute with water and sweeten to taste. Strain and add whole grapes, sliced bananas and a few small pieces of lemon. If red color is liked use one can of strawberries or raspberries.

When tender strain through a jelly bag, being careful not to press any of the pulp through with the juice. Add two-thirds of a cup of sugar to each quart of juice. Let it come to a boil. Skim carefully and can or put in bottles, sealing air tight.

Mrs. McClary.

CHAFING DISH.

"The frivolous work of polished idleness."

Kromanskies.—A Russian standby, are becoming a part of the bill of fare in many American households. They are particularly nice for luncheon or for Sunday night tea. For the latter they may be prepared the day before and tried in the chafing dish when wanted. To make them cut bacon into very thin regular slices and place on each a little finely minced cold meat of any kind, having seasoned with salt and paprika; add also a bit of cream. Roll each lightly. Place them on the ice. Fry a golden brown. Use skewers with kromanskies.

Mrs. Richardson.

Chicken with Mushrooms.—One good sized chicken boiled, cut into dice, one can of mushrooms, two tablespoonfuls of butter, one tablespoonful of flour, one-half pint of cream, one gill of chicken broth, the yolks of two eggs, salt and pepper. Mrs. John Cantwell.

Creamed Chicken.—One pint of minced chicken, one pint of sweet milk, one tablespoonful of butter, one tablespoonful of flour, season with salt and pepper. Place the butter in the pan and allow it to melt. Rub the flour into the melted butter and add the milk. Stir constantly until the milk comes to the boiling point. Lobster.—Melt four tablespoonfuls of butter, add three tablespoonfuls of flour and a liberal seasoning of salt and pepper. Pour in one and a half cups of milk and stir till creamy, then add one cup of lobster meat and one cup of canned peas from which every drop of liquor has been drained. Stir with a wire whisk till the sauce is creamy, then add one pound of lobster meat and two teaspoonfuls of lemon juice. Serve with sandwiches of graham or brown bread.

Melt two tablespoonfuls of butter in the chafing dish, pour in the egg mixture and cook till it is creamy, scraping it from the bottom of the pan as it becomes thick. Scrambled eggs are nice accompanied by saltine wafers.

To Make a Good "Rabbit".-Use a chafing dish. In the upper pan put enough milk-I don't know just how much-half a cup or a little more. Put in about two pounds of cheese cut up fine or mashed with a fork. Put in butter depending on the richness of the cheese, say butter the size of an ordinary hen's egg. set up machine, with hot water for a starter in the bottom pan and set flame agoing. Turn over the cheese occasionally, only do not stir. In a glass or other dish as seems necessary, mix up red pepper, mustard and any other seasoning that you may want. In another dish beat up one or two eggs, depending on how much of the stuff you are making. When the cheese is all melted (this is a critical point) put in the seasoning and mix. Put in the egg and beat well. If there seems to be too little milk in the solution, put in a little before the egg is added and allow to become heated. When the egg has been beaten well into the mess, cover and allow to thicken, stirring occasionally. N. F. McClary.

Tomato Fricassée.—One-half quart can of tomatoes, one heaping tablespoonful of butter, salt and pepper to season very highly, and one pinch of soda. Simmer fifteen minutes, add three well beaten eggs and take from the fire the moment it begins to thicken. Pour over toast.

Place the butter, water and chocolate in the chafing dish. Allow it to boil, stirring only when necessary to prevent burning. As soon as a few drops of the mixture will form a *soft* ball in cold water add the cream and boil until the same degree of consistency is again reached. Remove the pan and allow the candy to cool thoroughly. Flavor with vanilla and stir vigorously until the candy is set. Pour on buttered pan which is not more than six inches square, as the fudge is delicious when thick. Nuts may be added soon after the stirring is begun if desired.

Mrs. L. F. Hodge.

"Come, give us a taste of your quality."

Fondant.—Put two cups of granulated sugar and one of hot water (pinch of cream tartar if you wish) in a sauce pan on the fire and stir until the sugar is dissolved, not a moment longer. Watch while boiling, carefully wiping off the crystals which form on the sides of the pan, with a cloth wet in cold water, as these crystals dropping into the syrup will cause it to granulate when cooling; remove any scum which may appear. When it has boiled about ten minutes begin to test it. Chill the fingers in ice water, then dip them quickly in the syrup and back in the water. When the syrup picked up with the fingers forms a soft ball, pour it out on a greased platter (do not scrape out the sauce pan). When nearly cool begin to stir it with a fork or wooden paddle; stir continuously and rapidly until it is white and creamy; when too stiff to stir, knead till soft and smooth. This fondant forms the base of many candies.

Now you stir it, and you mix it, and you watch it all the time, and you boil the whole concoction till it hairs. Then you try it on a plate (it will surely be first rate), and you pour it into pans and cut it into squares.

Salted Almonds.—Shell the nuts and pour boiling water over them; let them stand in the water a minute or two, and then throw them into cold water, and rub between the hands. Put the peanuts in and let them cook, stirring constantly, until they are as brown as you wish. Remove and let drain in a sieve, then put them on several brown papers until all the lard is absorbed. When this is done, salt to taste.

Mrs. A. H. Proctor.

FOR THE SICK.

"Simple Diet is best; for many dishes bring many diseases."

Sleeplessness.—This may be relieved by laying a cold wet cloth on the back of the neck, with a dry cloth outside.

Beef Tea, No. 1.—Take a pound of the juicy round of beef steak; cut into thin strips an inch long; put into a sauce pan, and first cover with cold water; set over the stove where it will warm gradually; when it comes to a boil let it boil five minutes; pour off, and put in salt.

Mrs. M. K. Wead.

Beef Tea, No. 2.—Cut up the beef in small pieces, place in a bottle or glass can; set in a kettle of cold water and cook slowly until the juice of the meat is extracted. Add salt after it is done.

Mrs. McClary.

Chicken Jelly.—Half a raw chicken pounded with a mallet to break the bones; put in about a quart of warm water; let it simmer in a covered vessel until the meat is in rags and the liquid reduced one-half; strain through a coarse cloth, return to the fire, and season to taste; simmer five minutes longer; when cool skim the oil from the top. Keep on ice.

Indian Meal Gruel.—Stir two tablespoonfuls of the meal to a smooth paste with cold water and put into one pint of boiling water. Let this boil for one-half hour, stirring often as it burns easily; if too thick add a little water. Season to taste.

Farina Gruel.—Add one saltspoonful of salt to one cupful of boiling water; when boiling sprinkle in one teaspoonful of farina; cook for ten minutes; add one cupful of milk, cook five minutes and serve.

Sago Gruel.—A heaping tablespoonful of sago, washed in several slightly warm waters; put this into a coffeecup of water; when boiled up clear put in half a teacup of milk; as soon as scalded take off, and add one or two tablespoonfuls of thin cream; salt to taste.

Mrs. M. K. Wead.

Oat Meal Blanc Mange.—Cook to a jelly; strain through a fine sieve, and mould; salt while cooking.

Mrs. C. B. Beardsley.

Mutton Broth.—One pound of lean mutton or lamb, cut small; one quart of cold water; a small tablespoonful of rice, soaked in a little warm water; add a little milk if preferred; salt and pepper to taste.

Corn Tea.—Brown and pound in a mortar one cup of sweet dry corn; pour on two cups of boiling water, and steep fifteen minutes. This is light and nutritious, and can be taken when the patient is very weak.

Toast Water.—Slices of bread dried thoroughly and nicely browned; pour over enough boiling water to cover them; let them steep until cold, keeping closely covered; strain, and sweeten to taste; put a piece of ice in a glassful.

Hot Milk is both nourishing and stimulating, when one is weary it is more easily digested than cold milk. Should be taken slowly in sips.

For Indigestion.—Sprinkle cayenne pepper over food.

Flaxseed Lemonade.—Four tablespoonfuls of flaxseed, one quart of boiling water, let remain in a covered dish three hours. When cold add the juice of two lemons and sweeten to taste. Take ice cold. This makes a soothing drink in throat and lung troubles.

Kumyss.—Put into a self-sealing pint bottle one tablespoon of sugar, and one-sixth of a Fleischman's yeast cake; fill the bottle to within three inches of the top with new milk and seal. Let it remain in a warm place nine hours—shaking frequently, at least once an hour. Then let it stand in a cold place for three hours, when it will be ready for use. An excellent and nourishing drink.

Mrs. J. S. Phillips.

Cough Mixture, No. 1.—Two ounces of flaxseed, one-fourth pound of rock candy, one cup of sugar, three cents worth of hoarhound, one stick of black licorice, two lemons boiled whole, cut and squeezed after boiling; one quart of water. Simmer all except the sugar and licorice for two hours—then strain, pressing the juice from the lemons; add the sugar and licorice and stir over the fire until the licorice is dissolved.

L. C. Wead.

Cough Mixture, No. 2.—Make a syrup of one pound of white sugar and one pint of water; dissolve two ounces of licorice ball in one pint of water; one-fourth ounce of opium in eight ounces of alcohol; let it stand over night; one ounce of anise oil in two ounces of alcohol; one-half ounce of pulverized blood root steeped in one pint of water and strained; mix the ingredients; take one-half teaspoonful as often as the case may require.

Mrs. Gurley.

Cough Syrup.—One ounce each of licorice root, flaxseed, thoroughwort, slippery elm and anise seed; steep until all the strength is extracted; strain and add one pint of molasses and one pound of white sugar; simmer to a quart. Excellent for children.

Mrs. House.

Mustard Plaster.—Mix thoroughly flour and ground mustard in the proportions required—usually one-third mustard to two-thirds flour or mustard and flour equal parts—add hot water in sufficient quantity to make a thick paste. Spread on cotton cloth and cover with cheese cloth or old linen. Mixing with the white of an egg will prevent blistering.

MISCELLANEOUS.

"A storehouse of comical oddities
That have niver been neighbors before."

Entertainment Supplies for Fifty Guests.—For chicken salad allow five medium-sized chickens and twelve heads of celery. One hundred sandwiches; two loaves of loaf cake and three of layer. One and one-half pounds of coffee and three pints of cream for the same; two gallons of ice cream; two moulds of jelly.

Church Supper Supplies for One Hundred Guests.—For chicken pies use fifteen medium-sized chickens. For escalloped oysters allow two gallons of oysters, four pounds of crackers, two pounds of butter. For hash, ten pounds of corned beef with double the quantity of potato. With any two of these allow ten dozen biscuit; five pounds of butter; twelve pounds of ham before cooking; six quarts of cabbage salad; twelve heads of celery; five dozen boiled eggs for egg salad; seventy-five doughnuts; three pounds of cheese; three loaves of white cake, two of dark, four of layer; three pounds of coffee and three quarts of cream for the same.

To Make Sandwiches.—Butter the bread before cutting the slices from the loaf. In this way they can be made much thinner.

To Cut Warm Bread.—Heat a thin bladed knife on the stove or in boiling water.

To Cook Dried Fruits.—All fruits should be well washed and soaked in cold water twelve hours before cooking. Cook *slowly* in the same water.

To Stone Raisins.—Pour over them boiling water and the seeds can easily be removed. It also improves them for a cake or pudding.

Sharp Vinegar.—Put West India molasses into cold water until the mixture will bear up an egg, showing a piece of the egg shell as large as a five cent piece; set in the sun or a warm place. Remove the mother when it forms.

Vanilla Extract.—One vanilla bean, five tonka beans; ten ounces of alcohol, six of water, three of sugar; break the beans in small pieces; put all together and shake every day for six weeks.

Mrs. H. H. Thompson.

To Clean Straw Matting.—Wash with a cloth dipped in clean salt and water, then wipe dry at once. This prevents its turning yellow.

Filling for Cracks in Floors.—Thoroughly soak newspapers in a paste made of one-half pound of flour, three quarts of water and one-half pound of alum mixed and boiled until like putty.

Bouquet of Herbs.—Four leaves of parsley, one of celery, one of bay leaf, one of thyme, and two cloves; fold together and tie with a string.

To Remove Paint from Window Glass.—Put sufficient pearl-ash into hot water to make a very strong solution; saturate the spots of paint with this and let it remain until nearly dry; then rub off with a woolen cloth.

Mrs. Caldwell.

Ink and Iron Rust Stains.—Such stains can generally be removed from white cloth with oxalic acid. Wash immediately.

Mildew.—Take lemon juice mixed with an equal weight of salt, powdered starch and soft soap; rub thickly on the spots, renewing two or three times a day until the spots disappear; strong soft soap alone will often do as well if placed in the sun.

To Make Good Starch.—Mix the starch with cold water; add boiling water until it thickens, then add a dessert spoon of sugar and a small piece of butter or lard. This makes a stiff and glossy finish.

Paste.—Three level tablespoonfuls of flour with enough water for a smooth paste, one-fourth teaspoonful of powdered alum, one-half cup of cold water. Stir constantly and cook until well thick-ened; then add twenty drops of oil of cloves and pack in a glass jar. When mounting pictures apply the paste with a piece of soft cloth.

Mrs. McClary.

Shirt Polish.—One cup of starch, one and one-half ounces of spermaceti, three-fourths of an ounce of paraffine, one and one-half ounces of white wax, one teaspoonful of gum arabic, one quart of warm water. Mix, and boil ten minutes. Put one teaspoonful of the mixture to each pint of starch.

To Starch Mull or Lace.—Into a teacupful of water put a small teaspoonful of dissolved gum arabic; dry the goods after starching and dampen before ironing—will make them look like new.

To Wash White Flannel.—Dissolve borax, one tablespoonful for each three quarts of warm water. Let the goods soak in this an hour, turning over frequently. If much soiled, add a little white soap to the water and rub with the hands. Rinse and shake out well.

To Wash Calicoes.—Put a teaspoonful of sugar of lead into a pailful of water and soak fifteen minutes before washing. For stiffening navy blue cambrics use dark glue instead of starch.

Wash Goods liable to fade should be washed in a strong solution of salt, allowing a cup of salt to a quart of hot water. While the water is warm put the material in and let it lie for a time; then take out and wash in the usual way.

To prevent the salt from absorbing the dampness and becoming hard in the salt cellars during the summer season mix a little corn starch or rice flour with the salt, using one spoonful of starch to six of salt.

Hard Wood Floors.—First fill the wood. Then put on three or four coats of white shellac, letting each coat harden, after which put on a good floor wax. Rub the wax on with a cloth, letting it stand for an hour or more. Then polish with a weighted floor brush, first lengthways, then across. To keep in good order wax every month. Never put the wax on thick.

If hard wood floors are properly finished when laid they require but little attention to keep them looking well; a rubbing over with gasoline every two or three months will be all they require, and a broom covered with cotton flannel, the nap side out, is the best kind of a duster to use on them every morning.

Hard Soap.—Six pounds of sal soda, in crystal; three pounds of unslacked lime; four gallons of water; put all in a kettle and boil until dissolved; then let it settle; pour off the liquid and add to it seven pounds of clean grease (if tallow, six pounds); boil to the thickness of honey; pour into a wash tub and cut in bars.

Soft Soap.—Ten pounds of grease, six pounds of washing soda, eight gallons of hot water; let it stand for several days—until the grease is eaten up; if too thick add more water; stir every day. If wood ashes are used instead of soda boil the mixture.

To Clean Coffee and Tea Pots.—The black coating which collects inside the coffee and tea pots may be easily removed. Throw a handful of cooking soda in the pot, fill it with boiling water, let it stand on the back of the stove for five or six hours and then wash and rinse it in boiling water. Be careful to clean out the spout. This process will make the inside of an old coffee pot bright and sweet.

To Remove Coffee, Tea, Chocolate and Fruit Stains.—Place a bowl on the table, spread the stained part over it, pour boiling water on it from a height so as to strike the stain with force.

To Clean Lamp Burners.—Put the burners into water in which beans have been soaked or parboiled and boil one hour, then clean with sapolio or bath brick.

Mrs. F. W. Lawrence.

How to Keep Flatirons Clean and Smooth.—Rub them first with a piece of wax tied in a cloth, and afterwards scour them on a paper or cloth strewn with coarse salt.

To Wash Chamois.—Two quarts of moderately warm water, two heaping teaspoonfuls of borax, let soak for about ten minutes, then wash. Then take two quarts of water with one teaspoonful of borax, and wash again, rinse well, pull out smooth; when partly dry rub with the hands.

Mrs. Ralph.

Furniture Varnish.—One pint of Japan, five cents worth of asphaltum varnish, one tube of Indian red. Thin the mixture with spirits of turpentine and apply with a cloth.

Dents in fine Polished Furniture.—They may be removed in the following manner: Lay a number of layers of moistened brown paper over the dent, and put a warm iron over them. The steam will gradually cause the wood to swell and to fill up the dent. It sometimes requires patience, but slight dents that are a considerable mar to furniture can be raised in this way.

To Renew Black Silk.—Put on a perfectly smooth surface; sponge with clear, cold water until it sticks to the board and leave until thoroughly dry.

Mrs. Mallon.

To Restore Velvet that has been Wet.—Dampen it thoroughly on the wrong side; then hold it over a very hot iron, being careful not to let it touch the iron.

For a Burn.—Apply common baking soda; there is nothing better.

Mrs. C. B. Beardsley.

Antidote for Poison.—For any poison swallow instantly a glass of cold water with a heaping teaspoonful of common salt and one of ground mustard stirred in. This is a speedy emetic. When it has acted swallow the whites of two raw eggs. Marion Harland.

Spermaceti Salve.—One ounce of spermaceti, three of white wax, six of olive oil; melt the spermaceti and wax together; heat the oil and put all together, stirring until cold.

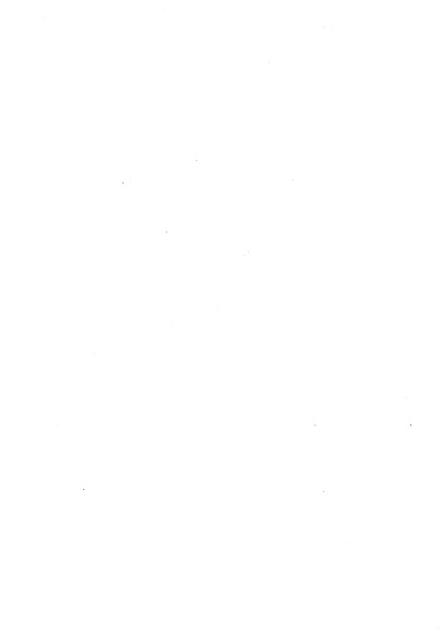

To Remove Discoloration from Bruises.—Apply a cloth wrung out in hot water and renew frequently. Or, apply a piece of raw beef.

To Keep Roses.—Lay them, their full length of the stems, in a pan of cold water, and place them in a cool place during the nights and they will keep for many days.

Each recipe is true and tried,
And some good housewife's honest pride—
Some home's delight;
And should your effort bring no prize,
I'll say not where the trouble lies,—
'Twere impolite.

Don't Blame the Cook.

Impure Cream Tartar and Bicarbonate Soda, fraud flavoring Extracts, adulterated Mustard and Ginger, are responsible for many a failure in pastry making.

Our Cream Tartar is absolutely pure, being powdered from the pure crystals.

Our Soda is the best grade of Bicarbonate Soda, none better.

We Manufacture Our Own Extracts.

Our Vanilla. Real Genuine Vanilla Extract is seldom found. It seems hard for extract makers to understand that it pays to give people what they pay for. We use nothing but the finest Mexican Vanilla Bean—and plenty of it. The extract has unusual strength and has a rare and peculiar delicacy.

Our Lemon and Strawberry are made from the fruit and are as good as our Vanilla in every respect; we also have an Almond and Rose Extract.

Olive Oil. We have the very finest Oil which can be imported. One trial will convince you. Use no other.

Huyler's Cocoa Powder. We have this most delicious of all Cocoa or Chocolate Powders. You can buy any quantity you wish from one ounce to a pound. It has no equal.

Our Ginger and Mustard are absolutely pure and go twice as far as the ordinary stuff usually sold.

PURE SPICES AND FLAVORING EXTRACTS

The value of spice depends on its strength and flavor. The same may be said of flavoring extracts. That spices and flavoring extracts are largely adulterated is certainly a deplorable fact. As quality in medicine should be of the utmost importance, so ought the articles used in preparing the food which sustains life, to be of a pure quality and of full strength. I have facilities for testing the purity of spices, and guarantee the ones I sell to be STICTLY PURE, free from adulteration and of EXTRA full strength. The Flavoring Extracts of Vanilla, Lemon, Orange, Almond and Rose are of my own manufacture and are guaranteed to be pure and Extra strong. All spices and flavors are sold in bulk and at reasonable prices. I solicit a share of your patronage, believing you will be pleased after a trial. Respectfully, C. L. CAPRON, PHARMACIST.
